 [einstein.princeton.edu](http://einstein.princeton.edu)  [a.einstein@ias.princeton.edu](mailto:a.einstein@ias.princeton.edu)  [einsteinphysics](https://github.com/einsteinphysics)  [albert-einstein](https://www.linkedin.com/company/albert-einstein)  [Google Scholar](https://scholar.google.com/citations?user=0X33184)  Princeton, NJ, USA

## EDUCATION

ETH Zurich (Swiss Federal Polytechnic) Ph.D. in Physics	Zurich, Switzerland 1900-1905
ETH Zurich (Swiss Federal Polytechnic) Diploma in Mathematics and Physics	Zurich, Switzerland 1896-1900
Aargau Cantonal School Secondary Education Certificate	Aarau, Switzerland 1895-1896

## EXPERIENCE

Institute for Advanced Study Professor of Theoretical Physics <ul style="list-style-type: none"><li>• Conducted research on unified field theory</li><li>• Collaborated with leading mathematicians and physicists</li><li>• Mentored numerous doctoral and post-doctoral researchers</li><li>• Published 33 papers during tenure</li></ul>	Princeton, NJ, USA 1933-1955
University of Berlin Professor of Theoretical Physics <ul style="list-style-type: none"><li>• Full professor and director of Kaiser Wilhelm Institute for Physics</li><li>• Developed foundations of general relativity theory</li><li>• Elected to Prussian Academy of Sciences</li><li>• Conducted research on light quanta and wave-particle duality</li></ul>	Berlin, Germany 1914-1933
ETH Zurich (Swiss Federal Polytechnic) Professor of Theoretical Physics <ul style="list-style-type: none"><li>• First full professorship position</li><li>• Developed key concepts in statistical physics</li><li>• Began work on general theory of relativity</li><li>• Mentored doctoral students in theoretical physics</li></ul>	Zurich, Switzerland 1912-1914
Swiss Patent Office Technical Expert, Second Class <ul style="list-style-type: none"><li>• Published seminal papers during "Annus Mirabilis" (1905)</li><li>• Developed special theory of relativity</li><li>• Formulated mass-energy equivalence (<math>E=mc^2</math>)</li><li>• Contributed to quantum theory with paper on photoelectric effect</li></ul>	Bern, Switzerland 1902-1909
